

2020

YONSEI TEMPORAL BONE DISSECTION COURSE

7th-8th May, 2020 / Severance Hospital, Seoul, Republic of Korea

Invitation

Temporal bone surgical dissection course is basic and essential for practicing otolaryngologists as well as ENT residents. The Yonsei temporal bone dissection course is held 2 times a year in a modernized dissection room with microscope, microdrills and whole head cadavers. Our course puts special emphasis on the latest advances in surgical techniques of neuro-otologic surgery. I do hope that you can achieve an improvement of surgical techniques from our course. We are looking forward to your participation.

Sincerely

Jae Young Choi, M.D., Ph.D
Professor
Dept. of Otorhinolaryngology-
Head & Neck Surgery

Introduction for Course

Our institute offers a 2-day course. This program is designed to provide training on the principles of temporal bone and otologic surgery to junior otology staffs, practicing otolaryngologists and residents.

The course will include :

- Mastoidectomy
- Tympanoplasty and ossiculoplasty
- Facial nerve decompression
- Cochlear implantation
- Endolymphatic sac surgery and translabyrinthine approach

Features

- Whole head cadavers for the effective practice of attendees
- Individual microscope and surgical instruments for each attendee and many skillful tutors
- Watching for live otologic surgeries
