

2020

9th Yonsei Dissection Workshop for Auditory Implants

27th-28th Aug, 2020 / Severance Hospital, Seoul, Republic of Korea

Invitation

Auditory Implants are the most promising treatment tools for hearing loss. Temporal bone surgical dissection course is essential shortcut for getting surgical technique for auditory implants. The Yonsei dissection workshop for auditory implants is held every year and you can achieve an improvement of surgical techniques from our course. We are looking forward to your participation.

Sincerely,

Jae Young Choi, M.D., Ph.D
Course Director

Introduction for Course

This workshop provides Otologist with a training platform to keep abreast of the recent surgical techniques in treatment of hearing loss, especially with auditory implant. Participants will have hands-on cadaveric dissection supervised.

The course will include:

- Simple Mastoidectomy
- Bone Conduction Implant(Bone Bridge)
- Middle Ear Implantation(SP, LP, RW Technique)
- Cochlear Implantation
- Inner Ear Dissection for ABI

Features

- Step by step dissection demonstrations
- CI, VSB, BB dummy will be provided
- One fixed softened cadaveric specimen per participant
